Dear Sushant,

I am pleased to extend an offer for an internship position at Arohi software development . We were impressed with your qualifications and enthusiasm during the interview process, and we believe that your skills and experience will be a valuable addition to our team.

Position: Internship

Department: full stack development

Start Date: 08 may 2024

End Date: 08 August 2024

Compensation: between 5k to 10k (depend on your work)

During your internship, you will have the opportunity to work on various projects and gain hands-on experience in your chosen field. You will be reporting to me, I will provide guidance and support throughout your internship.

Key Responsibilities:

1. Web Development: Developing and maintaining web applications, websites, and systems using a combination of front-end (HTML, CSS, JavaScript) and back-end (e.g., Node.js, Python, Ruby on Rails) technologies.

2. Database Management: Designing, implementing, and managing databases, including creating and optimizing database schemas and writing SQL queries.

3. User Interface (UI) Design: Creating and improving user interfaces to ensure a seamless and user-friendly experience.

4. Server Management: Deploying and managing web servers, ensuring their performance, security, and scalability.

5. Programming and Coding: Writing clean, efficient, and maintainable code, as well as debugging and troubleshooting issues.

 6. Version Control: Using version control systems (e.g., Git) to manage code repositories and collaborate with team members.

7. API Integration: Integrating external APIs into web applications for functionality and data exchange.

8. Testing and Quality Assurance: Performing testing and quality assurance to identify and fix bugs and ensure the reliability of the software.

9. Cross-Platform Compatibility: Ensuring that web applications and websites are compatible with various browsers, devices, and screen sizes.

10. Security: Implementing security best practices to protect against common web vulnerabilities, such as SQL injection and cross-site scripting (XSS).

11. Code Documentation: Creating and maintaining documentation for code, APIs, and system architecture.

12. Collaboration: Working closely with front-end developers, back-end developers, and other team members to develop, test, and deploy web applications.

13. Problem Solving: Identifying and resolving technical issues and challenges in a dynamic development environment.

14. Staying Informed: Keeping up to date with the latest technologies and best practices in web development.

15. Continuous Learning: Taking advantage of the internship as a learning opportunity, seeking guidance from mentors, and expanding your technical skills.

We expect you to maintain a high standard of professionalism and adhere to our company's policies and procedures throughout your internship. This is an paid internship position,

Please review this offer letter carefully and, if you accept our offer, share your response on whatsapp
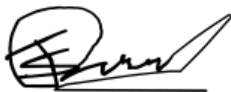

If you have any questions or need further clarification about the terms of your internship, please feel free to contact me at 7517861332.

We are excited about the prospect of having you join our team and look forward to a mutually beneficial partnership.

Sincerely,

Mr.Sanket Ghodake ,

Founder & CEO
